### **MarquipWardUnited Celebrates Major New Product Launch with Sale of First “TSKM” Sheeter to 3C Packaging, Inc.**

PHILLIPS, Wis. — May 8, 2009 — MarquipWardUnited, a leading provider of equipment and services for the sheeting, corrugating and finishing industries, has announced a revolutionary new addition to its range of precision sheeters. The new product, named the “TSKM,” represents a major development that offers advanced features and innovative design in a more compact and affordable size — perfect for mid-size converting operations, folding carton plants and commercial printers.

The TSKM utilizes MarquipWardUnited’s industry-leading knife design as well as state-of-the-art controls technology to give the TSKM the best speed curve on the market. This proved to be a key factor in securing the company’s

first order from 3C Packaging, Inc., which selected the TSKM from MarquipWardUnited to enhance its production speed and efficiency, said Joe Elphick, CEO and president of 3C Packaging. This innovative and versatile prototype will be installed in 3C’s Clayton, N.C., facility in June.

3C manufactures custom folding cartons, printed literature and unit dose packages for the pharmaceutical market. The company is committed to “Impressing Beyond Expectations” and is looking to enhance production by becoming faster and more efficient, Elphick said. Another consideration for Elphick was to buy from an American company. Drawing on the strengths of both the MarquipWardUnited and Apollo design and manufacturing teams gives the TSKM strong components that are made in both the U.S. and U.K.

The sheeter product line of MarquipWardUnited has grown significantly over the past eight years through a strong focus on global market coverage, new product development and the adoption of Lean manufacturing techniques. The combination of these significant technological

and organizational investments, along with the acquisition of Apollo Sheeters Ltd. in July 2008, has provided a clear path to leadership in the global sheeter market.

Complemented by Apollo and the addition of the TSKM, MarquipWardUnited now offers the widest range of precision sheeting equipment available in the industry, with full manufacturing facilities on both sides of the Atlantic and a worldwide field service and spare parts network.
