Wednesday, 8:30 - 5:00

Mechanical Systems
Pneumatic Systems

Thursday, 8:30 - 5:00

Electrical Prints
Interface
Electrical Sub-Systems
Allen-Bradley PLC

Friday, 8:30 - 3:30

Head Positioning Cards
System Control and Communication
Troubleshooting Overview
Conclusion

NOTE: It is highly recommended that maintenance personnel be somewhat familiar with order entry and configuration, status screens of the DECC computer and operator screens of the Slitter/Scorer operator station. This allows more time to be spent with the specifics of the use of the DECC computer.

Please discuss this with the Education and Training Department after reviewing this agenda. This has been written for all possible machines; some equipment may not apply for a particular class and will not be covered. Specific order for class may vary upon equipment presented.
