

Ringfeder

Upgrade Application

Applicable to all United and Koppers Rotary Die Cutters and Flexo Folder Gluers.

Upgrade Description

Ringfederal are keyless shaft-hub locking devices that provide an easily adjustable and releasable mechanical shrink-fit of gears onto shafts. They offer all the advantages of shrink-fits without the problems. Torque or axial loads are transmitted by radial clamping pressures and frictional surfaces of the locking device, shaft and gear.

Upgrade Features/Benefits

- Elimination of keys and keyways and associated fitting costs
- Completely tight fit around shaft - zero backlash
- Impervious to reversing, dynamic or shock loads
- Transmission of high torques and axial loads
- Easy installation, assembly and disassembly
- Easy axial and angular adjustments and timing

Productivity Improvements

- Zero backlash fit between gears and shafts results in improved operation throughout the machine, providing closer printing, slotting and die cutting registration
- Reduced maintenance costs
- Faster set-ups
- Less waste

Pricing, Installation, and Delivery

Contact your MarquipWardUnited Regional Product Support Manager or Regional Customer Support Office for pricing and delivery.

Warranty

One year on components.
