

Variable Speed Anvil

Upgrade Application

Applicable to all United Rotary Die Cutters.

Upgrade Description

The addition of our variable speed anvil mechanism (VSA) to your United Rotary Die Cutter results in improved die cut accuracy and quality by speed compensating the lower anvil as it wears. The lower anvil is adjusted in speed by driving the lower drum via the upper drum through an adjustable speed transmission.

Upgrade Benefits

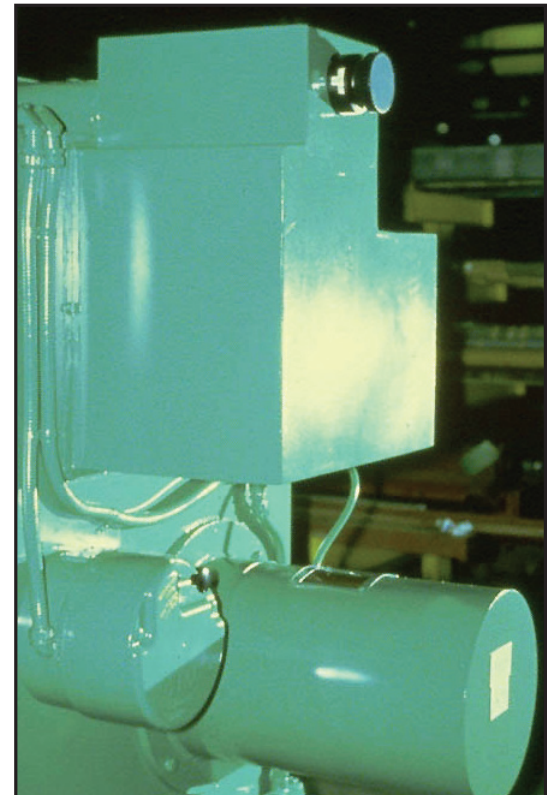

- Accurate die cutting
- Reduced stress and wear on cutting dies
- Increased anvil life

Pricing, Installation, and Delivery

Contact your MarquipWardUnited Regional Product Support Manager or Regional Customer Support Office for pricing and delivery.

Warranty

One year on components.
